Forester Names Altadyn's 3DXplorer as Web3D Pioneer

(Wireless News Via Acquire Media NewsEdge)

Altadyn, a developer of Virtual World creation platforms, announced that an independent research firm has recognized its flagship product 3DXplorer among the top pioneers of the emerging web3D market.

Altadyn said the executive summary of the report can be found at: <http://www.forrester.com/Research/Document/Excerpt/0,7211,45257,00.html>.

Altadyn's 3DXplorer V3, beta released last January, is a plug-in-less web3D online platform for building and visiting virtual worlds, 3D web sites and 3D web applications. 3DXplorer is based on Java and other widely used industry standards which make web3D immediately viewable on all Windows, Linux, and Mac platforms, and the majority of browsers such as MS Internet Explorer, Firefox, Safari, and Opera.

Discover how Unified Communications can help you gain the competitive edge, with more efficient internal operations, increased productivity and improved customer service. **Learn more, download free white paper.**

No matter your business size, 3Com has the VoIP solution to fit your needs. Come visit.
