

3DXplorer® for Manufacturing

A New 3D Solution Uniquely Fit For Manufacturing Companies Of All Sizes

3DXplorer is the *first* and *only* immersive and interactive 3D Online platform that can be developed and used without downloads or plug-ins—firewall and strict IT policies are not an issue. 3DXplorer is an infinitely scalable solution offering high performance real-time immersion with a wide range of powerful 3D applications. Progress smoothly from a proof-of-concept to integrating a matured solution by leveraging our dual SaaS/Enterprise tiers. Easily utilize existing 3D models by exporting/importing using COLLADA and 3DS formats. Our team is guided by executives with 25+ years of leadership experience in the PLM and CAD sectors—we know what your needs are, and have a unique solution for you.

Product Lifecycle Management, Sales and Marketing With Just One Tool... Really?

3DXplorer's unique set of features makes it the premier virtual communications and collaboration tool for just about all PLM processes, including but not limited to: specifications and concept design, simulations, tool design, assembly, sales, distribution and even maintenance. Easily and quickly create virtual conference rooms, technical facilities, showrooms, other promotional venues and much more. Instantly import existing CAD models—concepts, products, equipment, tools, etc. Meet with others in real-time; interact, collaborate, develop ideas, train and market in your custom 3D spaces.

Powerful Features

- Real-time immersive interaction
- Custom interactive avatars equipped with laser pointers (*point out specific areas of a part, object, assembly, etc.*)
- Maneuver 3D models (*move, rotate & scale parts, objects & more in real-time*)
- Simultaneous multi-desktop & multi-application sharing (*multiple engineers and/or instructors share desktops & applications at the same time for true collaboration and heightened innovation*)
- Integrated instant messaging & VOIP
- Enlarged presentation pop-up views
- Compatible with Collada & 3DS
- Instant access with any computer
- Web-based control & access or enterprise installation for maximum security

Seeing Is Truly Believing

There is no better way to research or understand what we're offering than to meet in one of our 3D spaces Online.

Practical 3DXplorer Applications For The Manufacturing Industry:

Standardize PLM, Marketing and Sales functions across remote locations, reduce travel costs, promote innovation, increase efficiency and allow remote contacts to feel connected.

▶ Create Virtual Conference Rooms for A Multitude of Manufacturing Processes

- Allow engineers to collaborate, discuss specifications, view and handle CAD concepts and then refine designs—synchronous 3D product development.
- Provide an engaging immersive environment to remotely educate and train your sales team and/or distributors. Being able to instantly import your 3D models, and allowing those in attendance to view and handle those models, offers the highest level of realism.

▶ Replicate Specialized Facilities for Virtual Simulations and Technical Training

- Train technicians how to assemble, repair and operate manufacturing equipment, your products, heavy machinery, specialty vehicles, etc. Run simulations of all kinds. Remember that you are able to replicate or create much more than just a room!

▶ Build Showrooms, Tradeshows and Other Virtual Venues to Market and Promote

- From a single location, interact with consumers and distributors from all over the world; allowing them to view and handle your 3D products. Promote sales, educate distributors, train technicians or even host innovative social networking events.
