

3DXplorer® Enterprise Edition

The 3DXplorer Enterprise Edition is a low-bandwidth infinitely scalable solution, offering high immersive 3D performance with a wide range of powerful 3D applications. The Enterprise edition is packaged for installation on your servers, providing you with unlimited use and full control of development, deployment and security.

Tiered product levels allow for efficient customer adoption and implementation. Progress smoothly from testing a proof-of-concept to integrating a matured solution by leveraging our strategically developed SaaS/Enterprise model (diagram 1).

The Enterprise Edition server software itself is easy to install, requires minimal bandwidth to deliver and only a low-grade computer for end-users to access (no software or plug-ins needed to install on end-user computers). In fact, the integration process for any IT department is extraordinarily simple.

The Enterprise Edition puts full control of development and customization in your hands. Use the integrated authoring tool, import user-generated 3D content and/or use the API for scripting (Javascript/PHP/HTML). Fully customize and even white-label your 3D applications. All data is converted to proprietary formats, can be password protected and is hosted behind your firewalls for maximum security.

Key Enterprise Characteristics

- Maximum Security
- Ease of Integration & Access
- Infinite Scalability
- Full 3D Customization
- Unlimited Use or Application Calls
- No End-User Software/Plug-ins to Install
- Browser-Based, Web-Native
- Win/Mac/Linux - Any Common Browser

Seeing Is Truly Believing

There is no better way to research or understand what we're offering than to meet in one of our actual 3D spaces Online. Contact us now to set up a 15-minute experience!

3DXplorer Enterprise Edition

► Practical 3D Applications

- **Enterprise Networking** - provide an immersive networking and socializing tool that keeps private communications behind your firewalls
- **Enterprise Conferencing in 3D** - import 3D products into your virtual rooms for collaborative product development meetings, or display confidential strategic presentations in an immersive 3D environment while keeping all proprietary information secure
- **Enterprise Training & Simulations in 3D** - develop interactive synchronous training environments and deploy training sessions to everyone within your organization securely
- **Enterprise eLearning** - add powerful interactive 3D to your Learning Management System and keep all courses and information confidential
- **Enterprise 3D Events** - host full-scale Webinars and virtual events inviting unlimited participants; even password protect your events
- **Enterprise 3D Websites** - offer 3D immersive Website "lobbies" for unlimited site visitors to access and be engaged by live representatives

► Key Features

- Create unique immersive & interactive 3D environments, objects, products, equipment, etc.
- Share multiple desktops & applications simultaneously
- Interact using personalized avatars that can walk, shake hands, sit, express emotions & are equipped with laser pointers
- Communicate using integrated instant messaging and VOIP
- Offer enlarged presentation pop-up views
- Stay organized using the meeting scheduler & history log
- Embed hyperlinks, slideshows & links to videos
- Set bell emails that automatically email visitor announcements
